

## **Symposium on the Assessment and Management of Environmental Issues Related to Eucalyptus Culture in the Southern United States**

Co-sponsored by the National Council for Air and Stream Improvement, Inc. (NCASI) and the USDA Forest Service Southern Research Station

February 22-24, 2012

Francis Marion Hotel, Charleston, South Carolina

Information and Registration: [www.eucalyptusenvironmental.org](http://www.eucalyptusenvironmental.org)

At this symposium, experts from within and outside the U.S. will share their data, experiences, and perspectives on key environmental issues related to eucalyptus culture. Symposium sessions will address invasiveness, water use and quality, biodiversity, and fire risk and will include a panel discussion on management approaches and information needs in the southern U.S. Following the symposium will be a field trip to observe local Eucalyptus plantations and research. Symposium attendees are eligible for up to 15.5 hours of Category 1 Continuing Forestry Education Credit from the Society of American Foresters. There is an open Call for Posters to be presented at the Symposium and a Call for Papers to be published in a special issue of the *International Journal of Forestry Research*. Symposium participation is not required to submit written papers. For more information, visit [www.eucalyptusenvironmental.org](http://www.eucalyptusenvironmental.org).
